

Project Design Phase

Problem – Solution Fit

Date	2 July 2026
Team ID	
Project Name	Library Book Request System using ServiceNow
Maximum Marks	2 Marks

Customer Segments (CS)

- College Students
- Librarians
- College Administration

Customer Jobs (CJ)

- Students want to request library books quickly.
- Librarians want to manage book requests efficiently.
- Administrators want a centralized and organized request management system.

Pains / Problems (P)

- Manual book request process is slow.
- Difficult to track submitted requests.
- No automatic request numbering.
- Possibility of errors in manual records.
- Librarians spend more time managing paperwork.

Problem Root Cause (RC)

- No digital platform for submitting library requests.
- Lack of automation in request processing.
- Manual validation and record maintenance.
- No notification system for librarians.

Existing Solutions (AS)

- Paper-based request forms.
- Manual registers maintained by librarians.
- Spreadsheet-based record keeping.
- Face-to-face communication for book requests.

Your Solution (SL)

The proposed **Library Book Request System** is developed using the ServiceNow platform. Students can submit book requests through an online form. The system validates the issue date, automatically generates a unique request number, stores the request in a custom table, and sends an email notification to the librarian. This reduces manual work, improves accuracy, and speeds up the request process.

Benefits (BV)

- Faster request submission.
- Reduced manual effort.
- Automatic request tracking.
- Improved accuracy.
- Better communication between students and librarians. □
- Organized and secure data management.

Triggers (TR)

- Student needs a book.
- Beginning of a semester.
- Assignment or examination preparation. □ Requirement for academic resources.

Emotions (EM)

- Students feel frustrated with manual processes.
- Librarians feel overloaded with paperwork.
- Users feel satisfied when requests are submitted successfully.
- Confidence increases due to an automated and transparent system.

Channels of Behaviour (CH)

- ServiceNow Web Application.

- College Network.
- Email Notifications.
- Library Management Portal.

Cost

- ServiceNow Developer Instance (Free for development).
- Internet connection.
- Computer/Laptop.
- Time spent on development and testing.

Value

The system provides an efficient, secure, and automated way to manage library book requests. It improves productivity, reduces paperwork, ensures accurate record management, and enhances the overall experience for both students and librarians.
